

Monthly update – Burwood North

25 March 2024

Sydney Metro is Australia's biggest public transport project.

The NSW Government is delivering Sydney Metro West – a new underground metro railway which will double rail capacity between Parramatta and the Sydney CBD, link new communities to rail services and support employment growth and housing supply.

Acciona Ferrovia Joint Venture (AFJV) has been awarded the contract to deliver 11 kilometres of twin metro rail tunnels between The Bays and Sydney Olympic Park and excavate five new metro stations, including Burwood North Station.

Work during April

Bulk excavation has been completed at both the northern and southern sites. The main activities during April will include:

- Preparatory works for the arrival of tunnel boring machines
- Delivery and construction of tunnelling support equipment
- Utility work on Burwood and Parramatta roads and Burton and Loftus streets
- Installation, adjustment and removal of fencing, scaffolding and hoarding
- Utility work for new driveways and construction of new driveways on both sites
- Delivery and pick up of oversize equipment to and from the northern site
- Road and pavement repairs
- Maintenance and adjustment of road signage
- Ongoing utilisation of southern site for worker parking

This work will be carried out during standard construction hours:

- Monday to Friday 7am – 6pm and Saturday 8am – 6pm

Work outside standard construction hours

As previously notified, AFJV will be carrying out utility, driveway, pavement repair, hoarding and signage work progressively on Burwood Road, Parramatta Road, Burton Street and Loftus Street. Some of this work as well as oversize deliveries must be undertaken outside standard construction hours to minimise impacts on traffic and to ensure the safety of motorists, pedestrians and workers. Night work will be carried out on no more than two consecutive nights, no more than three nights per week and no more than 10 nights per month at any one location.

This night work will continue to occur in the work area shown on the map overleaf between **8pm and 5am on Monday, Tuesday, and Thursday nights from Monday 1 April until Friday 3 May 2024.**

Activities associated with tunnelling, including tunnel support activities, lining and material removal and delivery is approved for 24-hour operation seven days a week. After 10pm deliveries and material removal will be undertaken using the site driveways on Parramatta Road only.

What to expect

- There may be some noise associated with the work but we will try to minimise this as much as possible
- Property and business access will be maintained at all times
- Noise blankets will be used to minimise disturbance during night work
- Saw cutting and hammering work will be completed by midnight for night work

Equipment used

Equipment used for this work includes but is not limited to: trucks, light vehicles, excavator and hammer attachment, generators, watercarts, concrete trucks, road profilers, concrete saws, bobcats, tunnel boring machines, multi-service vehicles, elevated work platforms, jack hammers, dozers, lighting towers, vacuum trucks, concrete pumps and hand tools.

Changes to traffic, pedestrian and cyclist routes:

Traffic control will be in place to assist motorists, pedestrians and cyclists at entry and exit points to the construction site. The utility work taking place in the surrounding streets will require some temporary footpath closures. Traffic control will be in place so access and two-way traffic can be maintained. Material removal and delivery may be undertaken from both sites using site driveways located on Parramatta and Burwood roads as well as Burton and Loftus streets between 7am and 10pm.
